

Community Outreach Stargazing

Visit the IAS online calendar for community, educational, and Society events. Discover dark sky observing sites throughout the state. Interact with members to grow your knowledge of observing and equipment.

Share your experiences to introduce and encourage visitors and students to actively participate and be enlightened.

Join us at one of our upcoming meetings and observing events. Learn how to become a member by visiting our website www.iasindy.org

Discover The Universe With IAS

BRIEF HISTORY OF THE IAS

The origin of the IAS goes back to the early 1930's. Mr. Samuel Waters, an avid amateur astronomer, invited Boy Scout troops to view the skies through his home-built telescope in his backyard in Indianapolis. Prior to the viewing sessions he would give a lecture about what was up in the night sky. Soon public awareness of the sessions generated larger and larger crowds and Mr. Waters formed an organization to promote astronomy to the public. The first meeting of the Amateur Astronomers of Indianapolis was on May 7, 1933. This organization subsequently became the IAS. Mr. Waters died in 1949, but the Society continued to flourish. A number of dark sites and smaller observatories were used by the IAS until 1988 when Indiana University offered the IAS access to the Goethe Link Observatory for meetings and use of the historic 36" telescope.

Public Education and Outreach

STIMULATE PUBLIC INTEREST IN ASTRONOMY

Share personal achievement and assist others to become more engaged in astronomical activities that show them how to learn about the universe.

FEATURED PROGRAMS AND EVENTS:

- VISITING GUEST SPEAKERS
- MEMBER PRESENTATIONS
- SPECIAL SKY EVENTS
- OBSERVING AND EQUIPMENT
- MEMBER HOLIDAY PARTY
- MEMBER PICNIC

The Indiana Astronomical Society (IAS) is an association of over 200 individuals from central Indiana who are interested in studying, observing, and promoting the science of Astronomy to the public. Our membership includes people of all ages and professions. We are a non-profit 501(c)3 organization.

Explore the Wonders of the Sky!

Where We Meet

Each month the Society holds a general meeting featuring a guest speaker. We hold summer meetings at the Link Observatory, south of Mooresville, about 35 minutes from downtown Indianapolis. Winter meetings are held at the Holcomb Observatory on the campus of Butler University. McCloud Nature Park, west of Brownsburg, is another site that provides a setting for our regularly scheduled observing and outreach events. Details of our meetings and events are featured in our online newsletter and are announced on our group Facebook page.

Get to Know Fellow Astronomers

IAS members have a wide range of experience that they are eager to share. For the newcomer, the members can assist you with visual observation and navigating the night sky. For the more experienced observer, the Society can assist you with pursuing interests in deep sky observing, astrophotography, and electronic viewing. Come observe, have fun, and meet with IAS members at the Link Observatory. Experience the 36" Link telescope and our Society's 14" SCT housed in the Tanager Hill Observatory on the north lawn.

Solar Observation

You do not need perfect, cloudless days to have fascinating views of our sun. Learn about the proper equipment required to view and photograph.

Astrophotography Workshop Sessions

Share equipment and software experiences in an informal setting. "How to" sessions are offered to members of all experience levels.

Equipment Loan Program

Part of the learning and sharing process for beginners and intermediate observers is determining what equipment meets your needs. We have telescopes to loan to help you in your discovery process. Also, our members will be glad to let you observe through their instruments at our stargazing events. They can guide you in selecting the best equipment when you are ready to make a purchase.

Check our calendar for scheduled dates and times of events and monthly meetings at the Link Observatory, south of Mooresville, and at the Holcomb Observatory on the campus of Butler University. For maps and directions to these meeting sites, see our website www.iasindy.org
